

Feature Structure Variables User Guide

Authors: The Apache UIMA Development Community

Version 2.3.0

Incubation Notice and Disclaimer. Apache UIMA is an effort undergoing incubation at the Apache Software Foundation (ASF). Incubation is required of all newly accepted projects until a further review indicates that the infrastructure, communications, and decision making process have stabilized in a manner consistent with other successful ASF projects. While incubation status is not necessarily a reflection of the completeness or stability of the code, it does indicate that the project has yet to be fully endorsed by the ASF.

Chapter 1. Feature Structure Variables

This is a package that allows you to create named feature structure instances. It allows you to refer to individual feature structures or annotations across annotators, without creating a special index.
